

A **nochar** ENVIRONMENTAL PROTECTION PRODUCT

nochar's A650 TM

nochar's A650 is a non-toxic, non-hazardous, non-corrosive, environmentally friendly petroleum solidifying agent (MSDS available) primarily for water-borne spills. Petroleum-based products include oils, fuels, solvents, paints, etc.

A650 is a dry granular material specifically designed to immobilize petroleum-based, water-borne liquid spills by solidifying the liquid. Unlike absorbants that soak up the liquid through expansion, **A650** bonds the liquid into a **solid carpet-like mass** with minimal volumetric increase and retains the liquid for easier removal. This will reduce wildlife loss. **A650** eliminates the dripping sponge effect by not allowing the liquid to be squeezed out and minimizes any residue or contamination.

A unique feature of **A650** is that while solidifying the petroleum-based spill into a **solid carpet-like mass**, it does not pick up any water in the process. This allows **A650** to be used on land for preventative measures prior to a possible spill. For example, a trench around a petroleum storage area or under an in-ground tank could be filled with **A650** to prevent ground contamination in case of a leak.

nochar's A600 Series of bonding agents can be formulated to fit your specific need. Formulas are available to clean up most liquid spills, from water to chemical. Also available is a fire retarded version for dry land spills where flammability needs to be inhibited. For water-borne spills that need to have flammability reduced, **nochar** recommends using **A650** first, then applying **nochar's E111** extinguishing gel (See **E111** literature).

A650 Fact Sheet

WEIGHT BY VOLUME

One pound equals 114 cubic inches

PICKUP RATIO

One pound will pick up 10 pounds liquid

SPECIFIC GRAVITY

.91

PH SPECIFICATIONS

Neutral (6.5 to 7)

STORAGE

Keep free of contamination

VOLATILITY BEFORE USE

None

VOLATILITY AFTER USE

Varies with flammability of liquid bonded

DISPOSAL

Caution should be exercised. Dispose of in accordance with federal, state and local laws for the solidified liquid

PACKAGING

A650 can be packaged in assorted sizes and containers depending on user need. Standard package is 40 lb. bags.

TOXICITY

Non-Toxic, Non-Hazardous, Non-Corrosive
