

# PILLOWS

nochar's **A670 Petro Bond Pillows™** are available in a variety of sizes to meet your needs. **A670 Pillows** are ideally suited for petroleum based spills on land or water. Petroleum based products include gasoline, crude oil, fuels, solvents, etc. All **A670 Pillows** are hydrophobic and oliophilic.

nochar has designed the **A670 Pillows** with the environment and the preservation of our natural resources in mind. **A670 Pillows** are a combination of nochar's Petro Bonding agent and a natural absorbant material that is specially processed from recycled materials. **A670 Pillows** are non-hazardous and very safe to use. For standard sizes, see nochar's suggested resale price sheet.

nochar's **A671 Liqui-Bond Pillow™** is designed for non-aggressive liquids. The **A671 Liqui-Bond Pillow**, which utilizes **A630R™** and the natural recycled material will quickly solidify and gel liquid spills such as water, contaminated water (both petroleum and non-petroleum mixtures), ammonia and other non-petroleum spills.
