

SHAKERS

Each of the **nochar's A600 Series™** bonding agents is available in easy to use shakers. Depending on which bonding agent you are using (**A610, A650, A640R, A630R, A660**, etc.), there will be (3) to (4) pounds of product in each shaker. The list below provides a few possible uses.

A630R™

Water
Plumbing Leaks
Laboratory Spills
Contaminated Water
Ammonia

A660™

Acids
Sulfuric
Hydrofluoric

A610 / A650 / A640R™

Petroleum
Gas
Diesel
Naphtha
Brake Fluid
Xylene
Kerosene
JP 4 Jet Fuel
Crude Oil

The flexibility of this container allows the A600 Series to be used anywhere a spill may occur such as laboratories, service stations, fueling depots, and manufacturing departments. They can also be carried on vehicles such as bulk petroleum trucks, liquid transport trucks, and police, fire and HAZMAT vehicles. The easy pour lid can be removed quickly for faster dispensing and allows for easy refilling from your bulk supplies. (See bulk information)
